About Yebna

Our Strategy to Success

Where We STARTED...

Yebna Quarries, founded by Darren McKenna and Bevan Radel in early 2009, acquired the Acacia Quarry site in July 2009. Since then, we have expanded to support large contracts across the Northern Territory. In 2015, Yebna Quarries purchased the Sunday Creek Quarry, enabling the supply of large volumes of sand.

“We take pride in providing top-tier products and services that exceed our clients’ expectations.”

And Where WE ARE TODAY!

Yebna Quarries continues to grow as a leading provider of high-quality construction materials, specialising in the extraction, crushing, and screening of aggregates.

With a commitment to excellence, we have expanded our operations to multiple locations across the Northern Territory, ensuring reliable access to top-grade materials for projects of all sizes.

Today, we are known for our top-tier equipment, advanced technology, and a dedicated team that consistently delivers an exceptional service.

Our reputation coupled with our affiliations and accreditations, has made Yebna a trusted partner for our clients, helping to build and support infrastructure with a focus on Quality, Sustainability, Innovation and Social Responsibility.

SOCIAL RESPONSIBILITY

SUSTAINABILITY

Superior Service Delivery

Our COMMITMENT

Our commitment is to provide an exceptional service to our valued clients, by delivering competitively priced, high-quality products while maintaining the flexibility to meet their diverse requirements. We pledge to operate with a socially responsible approach, ensuring that our business practices contribute positively to the community and environment.

“We are committed to providing an exceptional service and pledge to operate with a socially responsible approach.”

Our CAPABILITY

Yebna Quarries stands out for our robust capability to supply a diverse range of high-quality aggregates, sands, and specialty quarry products to meet the demands of large-scale civil, construction, and infrastructure projects.

With advanced extraction and processing equipment, we maintain precise standards of quality control, ensuring all materials meet rigorous specifications.

Our team of skilled professionals, and support staff work seamlessly to optimize production processes and enhance material consistency.

We prioritize safety and sustainability in our operations, integrating environmentally responsible practices. With a client-focused approach and a deep commitment to excellence, we have established our company as a trusted supplier, capable of supporting the evolving industry.

Side Tipper

Mobile Crushers, Screening Plant, Stackers, Cone Crushers

Capabilities and Capacity

Crushing and Screening

Delivering crushing and screening services with precision and efficiency meeting the specific needs of every project.

Our Crushing and screening services are essential in transforming raw materials into the desired size and quality for various construction and industrial applications.

Our services involve breaking down large rocks and stones into smaller, manageable sizes, followed by separating and sorting to meet project requirements through screening.

Our advanced equipment and experienced team ensure that every project receives consistent, high-quality output, tailored to meet our clients' precise requirements.

We optimize this process to enhance efficiency, reduce waste, and support sustainable project outcomes, making our crushing and screening services a critical component of successful project execution.

Diversity in Delivery

Showcasing our projects that emphasize efficiency, reliability, and quality service in every delivery.

01

CVL3 Leighton Contractors

Description: Supply and delivery of Stabilised sand and quarry products.

Location: Inpex Site Bladin Point

Value: \$20M

02

Monadelphus KT Pipeline

Description: Supply and delivery of Stabilised sand and quarry products.

Location: Inpex Site Bladin Point

Value: \$3M

03

ELE 1 Kentz

Description: Supply and delivery of TR Fine Sand.

Location: Inpex Site Bladin Point

Value: \$3M

04

GWA (North)

Description: Supply and delivery 100-800mm rock.

Location: Adelaide River

Value: \$1M
